3.1 Habitat types present on the site and assessment for them

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species					Population in the site						Site assessment			
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D.qual.	A B C D		A B C	
						Min	Max				Pop.	Con.	Iso.	Glo.
M	1307	Myotis blythii			r	430	430	i	P	G	C	B	C	B

Group: A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles

S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Other Site Characteristics

El refugio es una fortificación militar abandonada hace más de 50 años, que se mantiene en perfecto estado. Tiene tres bocas que comunican con el exterior, la puerta de acceso y dos troneras de menores dimensiones. Consta de varias salas de pequeñas dimensiones comunicadas a través de un pasillo largo y oscuro de techos que en raras ocasiones superan los dos metros. En este pasillo es donde se encuentra la mayor concentración de excrementos de murciélago. De escaso interés para otros usos.

4.2 Quality and importance

Este refugio ha logrado albergar la colonia de cría más importante de *M. blythii* de todo el Estado español. Esta colonia en la actualidad se ha reducido de manera drástica sin que exista causa conocida. A pesar de ello se considera importante el número de individuos que crían en este refugio. Este refugio está próximo a la ZEC Búnker del Tufillo, posiblemente los individuos de ambos refugios formen parte de una misma colonia que utilizan indistintamente o simultáneamente las dos localidades.
